

Exercice 1 : Supprimer toutes les parenthèses possibles.

$$A = (-7) + (+2) + (+5)$$

$$A = 7 + 2 + 5$$

$$B = (+8) + (-4) + (-6)$$

$$B = 8 - 4 - 6$$

$$C = (-4) + (-3) + (+7)$$

$$C = -4 - 3 + 7$$

$$D = (-11) + (+25) + (-19)$$

$$D = -11 + 25 - 19$$

Exercice 2 : Ajouter toutes les parenthèses possibles.

$$A = -3 + 4 - 5$$

$$A = (-3) + (+4) - (+5)$$

$$B = 15 - 18 + 13$$

$$B = (+15) - (+18) + (+13)$$

$$C = 7 + 15 - 22$$

$$C = (+7) + (+15) - (+22)$$

$$D = -35 - 15 - 28$$

$$D = (-35) - (+15) - (+28)$$

Exercice 3 : Supprimer toutes les parenthèses possibles.

$$E = (+25) + (-15) + (-8)$$

$$E = 25 - 15 - 8$$

$$F = (-18) + (+16) + (+3)$$

$$F = -18 + 16 + 3$$

$$G = (+24) + (-36) + (+11)$$

$$G = 24 - 36 + 11$$

Exercice 4 : Ajouter toutes les parenthèses possibles.

$$H = 15 - 12 + 6$$

$$H = (+15) - (+12) + (+6)$$

$$I = -17 + 48 - 32$$

$$I = (-17) + (+48) - (+32)$$

$$J = 16 - 13 + 49$$

$$J = (+16) - (+13) + (+49)$$

Exercice 5 : Calculer (remettez les parenthèses si nécessaire).

$$K = (-7) + (+2)$$

$$K = -7 + 2 = -5$$

$$L = (-4) + (-6)$$

$$L = -4 - 6 = -10$$

$$M = 24 - 36$$

$$M = 24 - 36 = -12$$

$$N = (-11) - 11$$

$$N = -11 - 11 = -22$$

Exercice 6 : Calculer.

$$A = 38 - 21$$

$$A = 38 - 21 = 17$$

$$B = 20 - 36$$

$$B = 20 - 36 = -16$$

$$C = (-14) - 14$$

$$C = -14 - 14 = -28$$

$$D = (-8) - (-10)$$

$$D = -8 + 10 = 2$$

$$E = 9 - (-4)$$

$$E = 9 + 4 = 13$$

$$F = 7 - 7$$

$$F = 7 - 7 = 0$$
